

FINIS®

TURNMASTER PRO

OPTIMIZE POOL SPACE FOR TURN TRAINING, PRACTICES, AND LESSONS

Focus on Turns

Divides one lane into two adding more walls to practice on

Vinyl Ester Chlorine Resistant Fiberglass

Aerospace material is built to withstand race speed turns and is resistant to chlorine damage

Optimize Pool Space

Create the ideal pool layout for practices or lessons

Simple 2-Person Installation

Easy to install in minutes

Streamlined design

Extends seamlessly across pool lanes

Built In Wheels

Available in Multiple Sizes

How to Get Started

How to Install

1. Roll the Turnmaster on its built-in wheels to the edge of the pool and lay it down on its side
2. Slide one edge of the Turnmaster into the pool and lower the rest of the bulkhead into the water. The bulkhead will conveniently float to the surface because of the built-in foam core
3. Push the Turnmaster Pro to your specified location and begin to rotate the wall to a vertical position relative the water with one person on each side of the wall.
4. Line up each side's bracket and hook it onto the lane line. Ensure that you have aligned the Turnmaster straight across the lane
5. Take the two straps and hook one on each side 4-5 lane line floats away from the Turnmaster or until the Turnmaster feels securely in place. This will stabilize the bottom of the Turnmaster and maintain the Turnmaster's vertical position in the water

Underwater Freestyle Turn Drill

1. Start about 10-15 yards away from TurnmasterPro. Swim towards it at a steady pace
2. When 5 feet away from the Turnmaster, take your last stroke and drive down into the water, fully submerging your body
3. Pull both hands down towards your hips, like the first part of a breaststroke pull down, propelling yourself toward the Turnmaster
4. Using the speed from your pull down do a flip turn against the bottom of the Turnmaster, keeping your entire body under water
5. Push off the Turnmaster in a tight streamline
6. Repeat 4-5 times and then do 2-3 regular flip turns against the Turnmaster
7. Taking the resistance away should make your normal flip turn feel incredibly fast. This drill is great to do before a race in order to feel that fast flip turn

Turnmaster Pro Specifications

- Material: Vinyl Ester Chlorine Resistant Fiberglass
- Color: White
- Sizes: 6'9" (2.05m); 7'3" (2.20m); 7'9" (2.35m); 8'2" (2.50m).
